## Dedicated Hosting Servers: Built For High-Performance

At the basic foundation of your hosted computing environment, a server is the most vital component of your IT solution. A dedicated server is completely devoted to your application's sole needs, and not shared with another customer, so you enjoy more performance and flexibility than a shared hosting solution or cloud instance. If you are running certain workloads, such as a database, a dedicated server is the only reliable solution to host your database. Codero offers a broad and growing lineup of server choices with [daily dedicated server deals](#) for those looking to get maximum performance at an affordable price. Our dedicated hosting solutions are fully optimized for speed, [security](#) and scalability. You can feel confident in our services knowing we have [SSAE No. 16 Certified data center](#) and [24x7x365 technical support](#) provided by our friendly, industry certified, seasoned staff.

## Dedicated Server Hosting Features

Codero offers the most demanded brand-name servers in the industry. Choose from [Windows®](#), [Linux and Unix®](#) dedicated servers... ideal for any hosting requirement you may face. Efficient and reliable, our dedicated server solutions support a variety of applications including multimedia, messaging, virtualization or high-volume transactions.

When you are ready to add more sites, more bandwidth and more concurrent users, you can move up to the next level of server. That way, you can strengthen your database, video and mutli-tasking capabilities... and still enjoy the best value. Responsive and scalable, every server is configured specifically to meet your exact demands. Each server comes with:

- 100% uptime
- Unmetered bandwidth options available
- Experienced 24/7/365 technical support
- Helpful answers from [Knowledge Base](#)
- [Rewards point program](#)
- Round the clock surveillance, security, network monitoring, and power backup systems

## Need More? Managed Hosting Works Behind the Scenes for You

As you select from high-performing server choices at competitive prices, you may want to consider the time you could save focusing exclusively on your business instead of your IT. That's where Codero's [managed hosting](#) fits in. It's ready to go to work for you whenever you are ready. We provide the server and infrastructure you need and then manage your server environment. Even better, managed hosting solutions can be further customized with a full range of [à la carte options](#).

Complete details about the level of support you qualify for with your dedicated server are available by downloading the [Scope of Support Overview](#).

Here's what people are saying about our services...

I have had my dedicated server with Codero for more than 2 years now and my customers are very happy with the response time and the service.

Damian Martinez
