

Cloud hosting services, your way, not ours. Customizable and affordable.

Cloud public hosting from Codero offers numerous benefits including on-demand scalability and flexibility. Cost-effective, it also requires less IT proficiency or management experience.

Cloud consumes less energy and leaves a smaller carbon footprint so it is a viable green alternative.

Codero's Cloud gives you a virtually unlimited amount of computing power that can be used on-demand as required and then billed by the hour or by the month. During this initial launch of Cloud, both payment plans are at below marketing prices. Monthly pre-pay offers an even deeper discount for paying in advance. Hourly allows you to pay for only what is used during the month and is billed after the completion of the month.

Let Codero develop a Cloud solution with a blend of security, control and cost that is just right for your company.

Codero Cloud Helps You:

- Cut and control costs
- Respond to traffic fluctuations
- Turn CAPEX into OPEX
- Rely on technical expertise
- Leverage multiple technologies
- Focus on core business
- Be greener and save energy

More information about Cloud is available on our website at www.cloud.com. To view our Cloud infographic with pertinent statistics, visit <http://www.codero.com/cloud-hosting/green/>.

Standard with Cloud:

- 100% uptime guarantee
