

Local Area Network (LAN)

Extra Security to Enhance Network Performance

Private LAN provides numerous benefits including increased data security to eliminate the chance that business productivity and revenues suffer should a mission-critical resource fail. LANs can assist in protection for sensitive data that could be lost, destroyed or stolen. It gives you comprehensive, private control.

Designed to safeguard and streamline your private server network, a Private LAN also maximizes the performance of your dedicated servers because public interface will be eliminated freeing up resources.

In addition to improving bandwidth efficiency, private networking can speed up downloading and uploading connection times since inter-server data transfers are separated from public Internet traffic.

Private Networking Solutions:

- Ideal for two or more dedicated servers
- Secure and share data within an isolated, private environment
- Fully optimize site traffic and transactions
- No virtualization required
- Separates inter-server data transfers from public Internet traffic
- Synchronize multiple servers
- Transmit private data and applications readily
- 1 Gbps Private Network (per server)

Standard with Load Balancing:

- ▶ 100% uptime guarantee
- ▶ 24/7/365 live U.S.-based support
- ▶ Customized configurations
- ▶ 100% powered green hosting
- ▶ Rewards Points program
- ▶ SAS 70 Type II certified
- ▶ Live chat real-time support
- ▶ Customer portal for troubleshooting
