

Server Monitoring

Track and Measure Performance

Server Monitoring can be used by Codero's dedicated server customers to achieve maximum uptime. Codero's solution provides an easy-to-use interface for historical trend analysis—supporting both polling and trapping mechanisms, and allows you to view high-level monitored resources.

Server Monitoring is available in two plans: Basic and Advanced. Thanks to the detailed reports and statistical data Server Monitoring provides, you have the opportunity to identify potential server problems and take proactive steps in advance.

Server Monitor Features:

- Easy-to-use web interfaces can be accessed anywhere at any time
- Designed for multiple platforms: Windows® & Linux®
- Service failure alerts minimize downtime
- Customizable event notifications
- Be proactive with detailed report data
- Access rights can be defined for each user

Standard with Server Monitor:

- 100% uptime guarantee
- 24/7/365 live U.S.-based support
- Customized configurations
- 100% powered green hosting
- Rewards Points program
- SAS 70 Type II certified
- Live chat real-time support
- Customer portal for troubleshooting
